In June 2007 right after the execution of the project for the rehabilitation of the basin of the river Máximo, this beach resort is reopened natural.

The bordering reconstruction of the base of campismo is straightaway initiated to the brook.

The project is executed by the Company of Campismo, specialists of the Ministry of Ciencia, Tecnología and Environment and Construcciones's Entrepreneurial Group Sugar.

The installation governs itself for the model of cabins dispersed in the forest, in perfect harmony, in space and landscape, they are equipped with modern furniture, the fans, television set, cooling equipment, bunk beds and bed include sofa.

In his host set count on restaurant, video living room, sports areas, stable, medical position, living room of computation and coffee shop. Unlike her previous one, now the area of bathrooms is located inside the base perimeters.

The surroundings where they are located host and the beach resort, they add it to the development of different projects, the ones they make a date between, the contemplative senderismo, expeditions of adventures in caves and historic sites - west of the saw of Cubitas -.
